

Putting prevention first: Leadership and action on reducing healthcare associated infections workshop – 17 May 2018 –

TOPIC: How Can We Standardise and Measure Environmental
Cleaning?

Our one big idea

*National KPI to standardise the measure of cleaning
HQSC should include the built environment in improvement programmes*

Main points of the conversation/emerging themes

- Why are each hospital group doing different measures?
- How to measure to give comparable data for education and improvement

Ideas/questions/issues for further discussion

- Standard measures give tangible goal for all stakeholders (from cleaners to auditor to management)
- Reportable data to gain resources and recognition of cleaning well and improvements needed
